HP USB Business Speakers

D9J19AA

Introduction

Quickly and easily add stereo sound to your workspace with USB-powered speakers. Get enhanced sound quality from the integrated DTS Sound Software.¹

Key Benefits

- Simply connect the speakers to any USB port on your PC. The included USB cable gives you plenty of room to position them where you need them, and minimizes cabling by reducing the number of power cords in your setup.
- Turn the speakers on and adjust the volume with conveniently located side wheels on the right speaker. The white LED confirms power. When you want to listen privately, use the stereo headset connection on the right speaker.
- Get improved acoustic performance from the new, large resonance chamber and bass reflex port. The stylish redesign includes a metal grill on the front panel and a strain release cable that helps prevent accidental toppling.
- Enhance your sound with the dynamic and subtle nuances of DTS Sound Software, available on the included software.¹

¹Software included in purchase. Installation required.
