Introduction

Because we recognize that your monitor is the center of your computing world, HP offers a variety of optional products (each sold separately) designed to complement our monitors and enhance the overall computing experience.

The HP Silver Flat Panel Speaker Bar lets you add stereo audio output to your HP LCD monitor without taking up any additional desk space. The HP Silver Flat Panel Speaker Bar is an excellent choice for improving the quality of multimedia presentations, streaming online video or Web-based seminars. It attaches easily to the bottom of the monitor to bring audio support features such as high-quality speakers and an external headphone jack right to the desktop.

The Speaker Bar is conveniently powered through a USB port located either on the PC or monitor (if the monitor has an integrated USB hub), so there are no power cords or AC adapters to be concerned about. This lightweight, elegantly-designed sound bar is fully supported by HP Technical Support when used with an HP system.

Key Features and Benefits

- Delivers two watts of total RMS output for a quality business audio experience
- Designed to easily attach and visually complement selected models of current and future HP LCD monitors (see compatibility chart below)
- Secures to the monitor with a Kensington lock slot
- Tested and qualified with HP Business Desktop and LCD monitor systems
