All you need in a fax, all in one easy-to-use package.

No wonder Brother's the best-selling fax brand.*

Technology should be all about making life easier especially where work's concerned. So Brother's FAX-T104 and FAX-T106 machines combine faxing, copying and phone facilities into one compact, easy to use package.

Outwardly, both models are very similar. Both have an integral handset, keypad and clear labelling, making them really easy to use.

To save you time, both have one-touch dialling for your most used numbers, together with a 100-number speed dial directory. And to save even more time, you can send the same fax to several people at once. You'll never miss an important fax either, with a 25 page memory.^

For extra convenience, both have a 10-sheet auto document feeder for larger documents and a 30-sheet paper capacity, so you'll spend less time refilling. Plus both will copy, reduce or enlarge documents from 50% to 150%.

Need an answering machine?

The FAX-T106 is the one for you.

The biggest difference between these two models is simple: the FAX-T106 also has an integrated digital answering machine, able to store up to 15 minutes of voice messages. And you can access your messages even when you're out.

So if you need a stylish fax machine that fits neatly into your home or office, the FAX-T104 and FAX-T106 makes the choice very simple.

More efficiency

10-sheet automatic document feeder

Never miss a call

digital answering machine built-in

Extra convenience

with integral handset

Easy-to-use

keypad and simple navigation

Save time

with 100 speed dial numbers
